- Targeted and Biological Therapies
- Transcultural Nursing Issues

Update Your Full
PROFILE
so We Can Better Serve You

ONS knows that not all oncology nurses are alike and strives to ensure you're getting the information and resources you in your practice. One way we do this is to customize the communications you receive from us based on the demographics in your ONS profile.

Create or update your profile today at profile.ons.org to ensure we know who you are and what you do. In addition to using your profile to customize your communications, we also look at overall membership demographics when planning educational programs, publications, conference sessions, and more. Your input will help to shape future ONS initiatives and ensure they meet your needs. Furthermore, when looking for volunteers to serve on project and planning teams, we review profile information to match members with volunteer positions that are best suited to their skills and expertise.

ONS also believes that every nurse is a leader. We look at leadership experience when selecting volunteers for projects like conference planning teams, membership advisory panels, and more. So, be sure to update the professional and leadership expertise area of your profile. It won't take long, and it's the first step in getting more involved in ONS at the national level.
